BRO CuP7

Product image

Description

BRO CuP7 alloy has a melting point of 730°C. Suitable to bond copper to copper, brass and bronze. Due to the phosphorus, it does not contain flux coating. Mainly used for HVAC-R, heating, cooling and gas facilities.

Se recomienda el uso de desoxidante BROPOLS en las uniones de cobre-latón y cobre-bronce

Composition

Normative

Cu 93% P 7%

UNE-EN 17672. CuP 180 alloy
